Outfall Replacement Project Information and Open House
Greater Nanaimo Pollution Control Centre

The Greater Nanaimo Pollution Control Centre discharges treated effluent to Georgia Strait through an outfall line that runs underground from the treatment plant to Morningside Park, and continues for 2 km out into the strait. The outfall pipe is experiencing failures and must be replaced as soon as possible to ensure continued protection of the environment. A draft site plan of the outfall construction project is provided on the back of this letter.

The first step in the process is necessary tree removal along the outfall replacement route. This removal should be undertaken in March, before the bird nesting season begins, and during the spring break at Hammond Bay School.

RDN staff will be available at the Greater Nanaimo Pollution Control Facility at 4600 Hammond Bay Road, from 6:00 to 8:00 PM on March 11 and 12, to meet with interested residents regarding tree removal plans.

You are also invited to attend an open house to view the plans and schedule for the subsequent replacement work:

**Date:** Wednesday, April 30, 2014  
**Time:** 4:00 pm – 7:00 pm  
**Location:** 4600 Hammond Bay Road, Nanaimo  
(entrance is located off McGuffie Road – signs will be posted)

**Construction Activities:**

- **March 2014:** Tree Removal  
- **May 2014:** Mobilization of Construction Equipment  
- **June to Sept. 2014:** Construction of the underground (land) outfall section  
- **2015 (planned):** Construction of the marine outfall section

If you have any questions about the open house, or the outfall replacement project, please contact Sean De Pol at 250-390-6547 or email sdepol@rdn.bc.ca.

Sincerely,

Sean De Pol  
Manager of Wastewater Services
