

## How to Receive Your Rebate

**1. To Qualify:** You must have an existing wood burning appliance (or open hearth fireplace) that does not conform to CSA B415.1 standards (typically an appliance built and installed before 1994). See the back of this brochure for eligible appliances. You must also be replacing your appliance no earlier than January 16, 2012 to participate.

**2. Shop:** Contact any of the participating retailers to seek advice on a low-emission heating appliance to purchase. Many of the retailers are offering additional discounts and rebates at the same time.

Upon purchase of your new appliance, you will be given a rebate voucher from the retailer. This form will need to be signed by the retailer at the time of sale and installation, and by the Nanaimo Recycling Exchange staff or RDN landfill or transfer station staff when the old unit is sent in for recycling.

*Note: Most insurance companies require notification if you are installing a new heating appliance. The value of the rebates cannot exceed the value of the appliance.*

**3. Disposal:** Your old stove must be taken to one of the authorized disposal locations to be recycled (whether by you or the installer). Upon disposal, your voucher will be signed OR you will be given a receipt, which will provide proof of destruction. This receipt should be attached to your signed rebate voucher.
