On leash is the rule. All dogs must be kept on leash (no longer than 2m) and under control at all times in Moorecroft Regional Park. This means:

- At all park entrances and picnic areas
- In the parking lot
- On the trails and in the forests
- In or near the water, i.e. the shoreline, the bays and Skipsey Lake

In other words, leashing is required everywhere within park boundaries. Cleaning up after your dog and properly disposing of waste is also required. These rules are enforceable under the RDN's Parks Bylaw 1399.

Conservation is the top priority at Moorecroft. With over 90 percent of Moorecroft Regional Park managed under a conservation covenant, wildlife and habitat protection is the top priority at the park. Since leash rules and limited-access covenant areas were established at Moorecroft, we are seeing increased wildlife activity and habitat recovery!

Help protect sensitive habitat by leashing and cleaning up after your dog, staying on designated trails and staying out of signed restricted areas.
Off-leash areas. The Greenmax Crown Woodlot (W1479) south of Moorecroft Regional Park is open to the public for off-leash dog walking. The woodlot can be accessed from the woodlot parking lot on Stewart Road or from the Moorecroft Meadow trail (see map).

*Always use a leash and bring bags to properly dispose of waste*

Off-leash RDN parks. Unless otherwise signed, all parks and trails in the RDN allow dogs off leash, but dogs must remain under control, which means dogs must be within sight and hearing distance and must respond to voice commands. Top Bridge Regional Trail and Englishman River Regional Park are two great local parks to explore with your dog.

Get directions and more RDN parks information at rdn.bc.ca/parks.
