Re:  Request to identify impacts on the Deep Bay Volunteer Fire Department as a result of the proposed BSI development

The Deep Bay Improvement District (DBID) board of trustees, at the September 18, 2013, board meeting, received the request from Boulevard Transportation Group Ltd. to “Identify impact as a result of the increase in permanent and RV Park population and structures on the response capacity of the Fire Department” and to comment on “the increase in the number of volunteers needed to evacuate the seniors housing in an emergency”.

The DBID board determined that there is not currently sufficient information or detail regarding the proposed development to be able to determine any impacts on response capacities of the Deep Bay Volunteer Fire Department at this time.

Sincerely,

DEEP BAY IMPROVEMENT DISTRICT

Leslie Carter
Administrator

CC:  Nadine King, Transportation Engineer, Boulevard Transportation Group
Lisa Bhopalsingh, Senior Planner, Regional District of Nanaimo
