Driftwood Water Service Area

Introduction
The Driftwood Water Service Area was established in 2001 and comprises an area on Higginson Road and Delanice Way on the Nanoose Peninsula. There are currently 12 residential connections and no commercial connections to the water system. The water source for the Driftwood Water Service Area comes from a series of groundwater wells located nearby. The water source is chlorinated and stored in one reservoir. Driftwood is now included in the Nanoose Bay Peninsula Water Service Area which includes all seven systems on the Nanoose Peninsula.

Detailed Description

Well
(see attachment for well locations)

Reservoirs
There is one reservoir of approximately 125,000 gallons located on Claudet Road.

Distribution System
The distribution system consists of a mix of 200mm and 150mm and PVC supply lines. Fire Hydrants are included in the system.

Maintenance Programs

Sources
Regular maintenance of the well head areas to ensure the risk of contamination or systems failure is reduced or eliminated.

Reservoirs
Reservoirs are flushed and cleaned every two years.

Distribution System
Water mains are flushed annually.

Current Year Planned Maintenance / Improvements

Fire Hydrant maintenance.

Water Sampling and Testing Program

See attached for all water testing reports.

The distribution system is tested using the following schedule.

<table>
<thead>
<tr>
<th>Timing</th>
<th>Location</th>
<th>Tests</th>
</tr>
</thead>
<tbody>
<tr>
<td>Weekly</td>
<td>In house laboratory (RDN)</td>
<td>Fecal Coliforms, Total Coliforms, Temperature, PH, Chlorine, Total Dissolved Solids, Salinity, Conductivity, Iron, Manganese</td>
</tr>
<tr>
<td>Weekly (Health Dept. Required)</td>
<td>Independent Laboratory*</td>
<td>Fecal Coliforms, Total Coliforms</td>

<tr>
<td>Monthly</td>
<td>Independent Laboratory*</td>
<td>Chloride</td>
</tr>
<tr>
<td>Quarterly</td>
<td>Independent Laboratory*</td>
<td>Chloride, Conductivity, Sodium, Total Dissolved Solids</td>
</tr>
<tr>
<td>Annual</td>
<td>Independent Laboratory*</td>
<td>Complete potability testing in both wells in October. Complete potability testing in system water (residence).</td>
</tr>
</tbody>
</table>

* North Island Laboratory.

Source Transmission and Distribution System Water Quality

See attached lab analysis sheets

Emergency Response Plan

The Driftwood Water Local Service Area Emergency response plan is attached for information. This document is updated annually to ensure contact and other relevant information is in place. The emergency Response Plan for part of the overall RDN’s Emergency Response Plan Document.
### Cross Connection Control Program

Cross connection control is largely achieved through the installation of dual check valves at every metering point in the system. A Cross Connection Control is being developed in 2007.

### Water Quality Inquires and Complaints

Inquiries were of a general nature related to the delivery of potable water to serviced properties.
