Decourcey Water Service Area

Introduction

The Decourcey Water Service Area was established in 1988 in a rural area south of Nanaimo, and comprises two properties on Bissel Road and two properties on Pylades Drive. The water source for the Decourcey Water Service Area comes from one groundwater well located nearby. The water source is unchlorinated and is stored in one reservoir.

Detailed Description

Well
Well is located at 3280 Bissel Road, Cedar, BC

* Emergency chlorine treatment is in place should it be required.

Reservoir
There is one reservoir of approximately 35,000 gallons.
The reservoir is located at 3280 Bissell Road, Cedar, BC

Distribution System
The distribution system consists of a 150 mm PVC supply line. Fire Hydrants are connected to the system.

Maintenance Programs

Sources
Regular maintenance of the well head areas to ensure the risk of contamination or systems failure is reduced or eliminated.

Reservoirs
Reservoir is flushed and cleaned every two years.

Distribution System
Water mains are flushing annually.

Current Year Planned Maintenance / Improvements

No major work planned.
Fire hydrant maintenance.
Installed fence and alarm system at the pump station.

</table>

* North Island Laboratory.

Emergency Response Plan

The Decourcey Water Local Service Area Emergency response plan is attached for information. This document is updated annually to ensure contact and other relevant information is in place. The emergency Response Plan for part of the overall RDN’s Emergency Response Plan Document.

Cross Connection Control Program

Cross connection control is largely achieved through the installation of dual check valves at every metering point in the system. A Cross Connection Control is being developed in 2007.
### Decourcey Water Service Area

**Water Quality Inquires and Complaints**

Inquires were of a general nature related to the delivery of potable water to serviced properties.
