

## Construction on Andover Road - PRV Replacement Project, February to March 2024

The Regional District of Nanaimo (RDN) will be constructing a new pressure-reducing valve (PRV) chamber at the southwest end of Andover Road in Nanoose Bay beginning the week of February 26, 2024. One lane of traffic will be kept open on Andover Road while work is underway. Work is expected to take place during daylight hours from February 26 to March 30, 2024. Low levels of construction noise from excavators and dump trucks can be expected. For your safety and the safety of the work crews, please remain alert to work activities and obey posted signs.

During the construction period, water service will be temporarily interrupted while the new PRV chamber is connected to the existing watermain. A service alert with specific dates and times will be issued before any planned water service interruption.
