

NOTICE

Water Quality Advisory

LIFTED

Whiskey Creek Water Service Area
Effective date: DECEMBER 10, 2013

- The Water Quality Advisory has been lifted effective immediately.
- The Regional District of Nanaimo (RDN) has completed necessary maintenance to your water treatment system that will allow effective disinfection of the water from the Crocker Creek supply, resulting in microbiologically safe drinking water during extreme storm events. The RDN and the Vancouver Island Health Authority (VIHA) will continue to work together on future upgrades that will ensure the drinking water meets the BC Surface Water Treatment Objectives and is safe to drink.

Thank you for your patience as we worked through upgrades and improvements to your water system. We do not anticipate any further services disruptions.

If you have any questions or require further information, please contact:
