002571633

Enter full or partial PID with no spaces or separator. eg. 111222333. Click 'Search'.

Search Reset

Apply 'Search'

RESULT FOR BOTH SEARCHES:

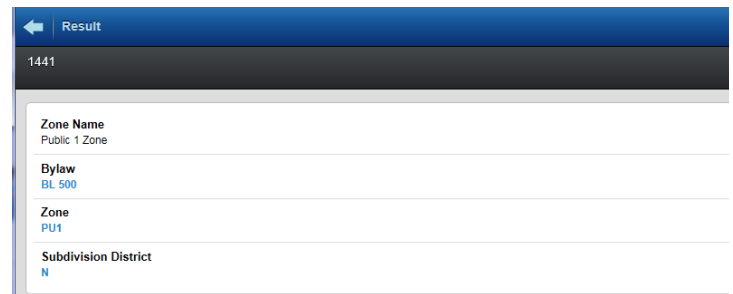

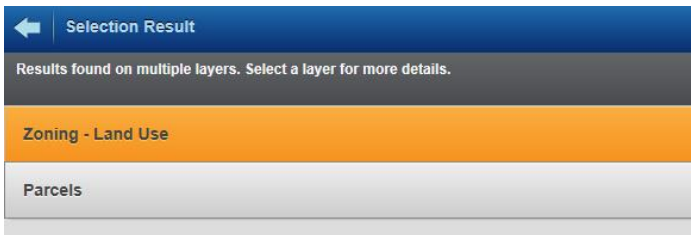

TOOLS:

The Identify Tool – Select the tool and tap inside the map to access information on the available layers.

‘Parcels’ provides information on Properties including PID, FOLIO, Legal Description.

‘Zoning – Land Use’ provides information on the Zone Bylaw, Zone and Subdivision District. Hyperlinks open descriptive pages for each.

The Selection Tool - Tap on the map, drag and release to create a box shape that selects shapes from multiple layers in the map. Tap the desired layer to view the details of each shape in the selection.

The Layer Manager – Opens a dialogue page that lists all available map layers and enables the user to turn layers ON/OFF. This is where the Air Photo layer can be turned on.

Email Map – This function is dependent on the capabilities and settings of your device and that of the recipient. It generates an Email message containing a url that records the current map view and enables the Email recipient to open the map with that same view.

Measure Point - Tap to get Coordinates (Lat long in Decimal Degrees).

Measure Distance – Tap and drag line to get Distance (use drop down to select unit type).

Measure Area – Tap and drag shape to get Area (use drop down to select unit type).

For more assistance contact the RDN GIS Dept:250 390 4111 or 1 877 607 4111 or gis@rdn.bc.ca

BE ADVISED TO CONTACT THE REGIONAL DISTRICT OFFICE BEFORE TAKING ANY ACTION BASED ON INFORMATION PROVIDED IN THE MAP.
