A Site Profile was previously submitted to the Regional District of Nanaimo along with an application for rezoning and redevelopment of the above-referenced site. It is requested that the Director of Waste Management provide notice to the Regional District of Nanaimo that it may approve the rezoning and development because, in the opinion of the Director, the site would not present a significant threat or risk if the application were approved.

The following documentation is provided to support this release request:

1. A signed statement from the proponent confirming that a development permit application will be following; and
2. A Preliminary Site Investigation will be completed at the Site.

Please contact the undersigned at 604-895-7635, if you have any questions about this letter.
