## **SECTION 1**

### **1.1 Requirement**

The Regional District of Nanaimo (RDN) is issuing this Expression of Interest to determine if there is any contractor interest in providing on call crane truck services on behalf of the French Creek Pollution Control Centre located at 957 Lee Road in Parksville, BC.

### **1.2 Background**

The French Pollution Control Centre has contracted out crane truck services for many years to a contractor using a Hiab knuckle boom crane model 095-2 with a pull master PL-2 winch. This unit was a bit large for the FCPCC's requirements but did the job. Most of the projects involve pulling pumps from 10' to 20' below grade and sometimes lifting them over an 8' enclosure. The heaviest pump is about 600 kg with a 4m reach and most are less than 300 kg with the furthest reach around 6m. A heavy duty pickup truck chassis with a flat deck, winch and a mid-mounted crane would be ideal.

### **1.3 General Specifications**

Outreach - Lifting Capacity, ft/lbs (generally what is thought is needed):

7' 3" – 3,790

11' 6" – 2,290

15' 9" – 1,630

20' 4" – 1,230

25' 3" - 970

Winch

## **SECTION 2**

### **2.1 What to Submit:**

- a) Technical specifications of truck and crane.
- b) Rates
- c) Photos (if possible)
