

REQUEST FOR PROPOSALS No. 20-009

2020 ORTHOPHOTOGRAPHY SERVICES

Addendum No.2

Issued: February 27, 2020

Closing Date & Time: on or before 3:00 PM Pacific Time on March 5, 2020

This addendum shall be read in conjunction with and considered as an integral part of the Request for Proposal. Revisions supersede the information contained in the original Proposal or previously issued Addendum. No consideration will be allowed for any extras due to any Proponent not being familiar with the contents of this Addendum. All other terms and conditions remain the same.

Questions & Answers:

Q1. Is there an accuracy requirement for this project?

A1. The RDN does not have a specific accuracy requirement. The use of ground control and/or Provincial DEM has been used to establish the accuracy of the orthophotography.

Q2. Regarding the deliverable requirement that "elevated structures must be ortho-rectified to their true geometric position", does this indicate a requirement for a true ortho deliverable? Also, is there a definition or limitation for an elevated structure?

A2. The RDN expects a true ortho deliverable. This requirement is meant to ensure that the orthophotography remains accurate in areas of elevation change.
