## **French Creek Pollution Control Centre – Potential Increase in Odour Emissions**

The Regional District of Nanaimo (RDN) is performing maintenance and repair of the digesters and integrated odor control system at the French Creek Pollution Control Center (FCPCC) over the next several weeks. During this time, there may be elevated noise levels during work hours, an increase in the frequency of service and delivery trucks, and higher-than-normal odours.

No excessive odor emissions have been detected to date. With the onset of unseasonably warm weather over the coming days, higher-than-normal odours from the facility may occur until temperatures return to seasonal levels. Residents can report odour-related concerns to FCPCC staff at 250-248-5794 during regular business hours.

These essential maintenance and repair tasks will enable the system to perform more efficiently and result in a more efficient odor reduction system. We appreciate residents' understanding and patience while we aim to complete this work as quickly as possible. For more information about the French Creek Pollution Control Center, visit [rdn.bc.ca/french-creek-pollution-control-centre](https://rdn.bc.ca/french-creek-pollution-control-centre).
