
Watermain Flushing – French Creek Water Service Area
November 1 - 5, 2021

Regional District of Nanaimo (RDN) water system operators will be doing an extensive flush (cleaning) of the watermains and the water storage reservoir in the French Creek Water Service Area to reduce or eliminate residual minerals present in the water system. The flush will be completed the week of November 1 - 5, 2021. It is important to remember that although the system flush will be very thorough, occasional discoloured water events may occur for several months as any remaining deposits are flushed from the distribution system by everyday water usage.

Water Service Area customers should expect temporary disruption of service, intermittent drops in pressure and water discolouration between the hours of 8 a.m. and 4:30 p.m. on the dates listed above. Please do laundry only in the evenings or on the weekends and ensure you have sufficient water for the day. The RDN is not responsible for any damages resulting from the use of discoloured water.

Please visit rdn.bc.ca/french-creek for more information about the French Creek Water Service Area.
