Submit application and claim to:

Drinking Water & Watershed Protection, Regional District of Nanaimo
 6300 Hammond Bay Road, Nanaimo, BC, V9T 6N2
 Fax: 250-390-1542 Email: watersmart@rdn.bc.ca

5. IRRIGATION UPGRADES ELIGIBLE COMPONENTS CHECKLIST:

The below checklist contains automated irrigation system features that must be included to be eligible for the Irrigation Upgrades Rebate, complete the section(s) you were pre-approved for only. The installation of eligible irrigation components must be completed by an IIABC Certified irrigation contractor. See www.irrigationbc.com for more information. *Note: do not complete this checklist if you only completed the Soil Improvements portion of the rebate program.*

CHECK TO MAKE SURE UPGRADED IRRIGATION COMPONENTS ARE ELIGIBLE:

Smart Control Automatic Irrigation Controllers

- Has a minimum 4 program capability.
- Can have multiple start times per day.
- Features a “seasonal adjustment” or “% adjust” option for programming relative water reductions.
- Can connect to a sensor (soil-moisture, weather, or rain) and alter program based on sensor data.
- Has a 365 day clock.

Rain Sensor

- Can connect to and be compatible with the installed automatic irrigation controller.
- Can automatically shut off irrigation system based on rain detection.

Soil moisture Sensors

- Can connect to and be compatible with the installed automatic irrigation controller.
- Can monitor soil conditions by measuring soil moisture at the root zone of plants.
- Can adjust irrigation programs or shut off the system based on detected soil moisture levels.

Weather-Based Sensors

- Can connect to and be compatible with the installed automatic irrigation controller.
- Can monitor weather conditions and calculate evapotranspiration.
- Can adjust irrigation programs or shut off the system based on collected weather data.

Drip Irrigation Components (note that soaker and weeper hoses, and "microspray" emitters are not eligible)

- Can deliver water at the plant root zone.
- Uses less than 20 gallons of water per hour at less than 25 PSI (pressure reducing valve installed).
- Include filtration to prevent clogging of emitters.

Matched Precipitation Rotators

- Distributes water evenly across varying spray radii and spray arcs.

By signing below, I declare that I have read the requirements of the RDN Irrigation Upgrades & Soil Improvements Rebate Program provided on www.RDNrebates.ca and/or on the 2023 Irrigation Upgrades & Soil Improvements Rebate Information sheet and I understand that the RDN is not responsible for the installation, performance or maintenance of any changes/alterations related to this rebate program.
